

## **6<sup>th</sup> Grade Self-Contained Apple iPad Classroom Information**

We would like to provide you with information regarding the Apple Classroom for the 2019-2020 school year. This program will utilize the Apple Classroom Application to manage a One-to-One Blended Learning classroom environment. If you would like your child to be considered for participation in this program, please complete the survey by clicking on the link "Apple Classroom" under "Academics" on the Meigs website, or by clicking the link in the email that will be sent to you. To be considered, the survey must be completed by May 24, 2019.

### **Requirements:**

1. Own or purchase an iPad Mini 4, iPad 9.7 or iPad Pro (running iOS 12 or newer)
2. Own or purchase a protective case with a Bluetooth keyboard
3. Your child must attend the "Meigs 101" Orientation (1/2 day on Monday, July 29, 2019)
4. A parent/guardian (preferred) or adult designee must attend the Parent Orientation in the cafeteria at 12 pm on Monday, July 29, 2019 (at the end of Meigs 101).
5. Give consent for your child's participation in this program.

### **Other Considerations:**

- Classes will be balanced based on the diversity rules applied to all homeroom classes (ex: considering gender, ability, ethnicity, etc.).
- \*If you would like your child to participate in the iPad Self-Contained Classroom but cannot afford a compliant iPad, please complete the survey as well. A minimum of 10% of the spaces available will be reserved for students who qualify as economically disadvantaged. We will provide iPads for these students to use during class.
- \*\*If you are selected, we will email you with instructions to accept your child's position and to confirm you have met eligibility requirements. This will need to be done by the 1st week in July. If your position is not accepted and requirements are not met by the designated time, we will withdraw your child from the roster and enroll another student from the waiting list.

### **iPad Self-Contained Classroom Q & A:**

- **Question: How is a One-to-One Self-Contained Classroom structured?**

Answer: At Meigs, our two One-to-One Self-Contained Classrooms (one in 5<sup>th</sup> Grade and one in 6<sup>th</sup> Grade) each consist of a class of students who receive all of their academic instruction in one classroom instead of switching throughout the day to multiple classrooms. There is integration and collaboration between the two teachers, Mr. Johnson (5<sup>th</sup>) and Mr. Parsons (6<sup>th</sup>). In these Apple One-to-One Classrooms, Blended Learning is used, and each student has his/her own iPad. Students still attend lunch, recess, and Related Arts outside of their self-contained classroom.

- **Question: What is Blended Learning?**

Answer: Blended Learning combines online digital media with traditional classroom methods. It also uses some aspects of a flipped learning environment. As defined, flipped learning strategies use class time to do activities and lessons (guided by the teacher) and "homework" time for guided instruction, usually through video. Basically, it turns a classroom upside down: the learning of a topic might be done at home and then the applied practice or work is done at school.
